

PREVENTING SLIPS, TRIPS & FALLS.

Fall in love, not in agony!

RISKS: BE AWARE WHEN...

- Walking on wet or slippery floors.
- Vacuuming around fixtures and furnishings.
- Doing high pressure water cleaning.
- Working in cluttered spaces.
- Carrying equipment especially on stairs.
- Collecting and disposing of rubbish.
- Not concentrating or taking care.

What other risks are present in your workplace?

01 FEET

Always wear suitable slip resistant footwear at all times. (Do not wear thongs, bare feet, heels etc.)

02 FLOOR

Avoid walking on slippery or wet floors (eg: after mopping spills, rain etc) or walking from wet to dry surfaces.

03 FINISH

Complete all other tasks before cleaning.

04 METHOD

Select floor cleaning methods, chemicals and products that do not create a slip hazard.

05 MATS

Use non slip mats for wet and slippery areas. Maintain and replace mats often.

06 SIGNS

Use safety signs and barricades. Warn of and section off wet and slippery areas.

07 SPILLS

Ensure all spills or leaks are cleaned up immediately.

08 TRAINING
